

# dempsey II Residential & French doors

## durability by design

stylish & secure

our “dempsey II french & residential” timber doors are designed with durability in mind

### Proven Solution

Designed and manufactured “in house” by our dedicated team, our Dempsey II doorsets are able to withstand all weather conditions with design enhancements for severe weather

Dry gasket glazed with a sloped or concealed drainage system which helps to eliminate the possibility of moisture becoming trapped by providing ventilation to the rebate and an escape route.

### Superb Design

Our residential door sashes are 58mm thick allowing for improved locking systems with engineered laminated door stiles for stability.

Available with 24mm double glazed units or solid Timber panels with matching sidelights, we have a solution that meets your requirements.

Dempsey Dyer Ltd

# dempsey II residential & french doors

## a way forward for style & security

# modern security, traditional aesthetics

## ironmongery & accessory options

designed with a selection of sustainably sourced timbers, our dempsey II doorsets can be manufactured with a minimal environmental impact

The standard Dempsey II doorset has been developed as a truly versatile solution that can be tailored to meet your bespoke requirements. Examples of our range of door styles can be seen to the right.

Timber Species available include Sapele, Oak and Accoya. Other species are available on request. Please see our timber species brochure for further information.

The majority of our timbers are sourced with one of 'Verified Progress', 'FSC' or 'PEFC' certification marks. These marks are designed to audit the logging industry ensuring environmental impacts are minimised.

As we have complete control of the design and manufacturing process, we can truly tailor your Dempsey II doorset to suit your requirements. With over 30 years experience in the design and innovation of timber products - ask for the Dempsey II doorset in your home.

### Security

We are committed to ensuring our products stay at the forefront of innovation and design through our partnership with BSI Product Services.

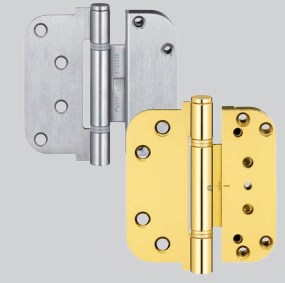

To achieve Secured by Design, our timber residential doors are manufactured to the PAS 23/24 standard. Normally, the Secured By Design standard requires laminated glass. These details are confirmed following discussions with the client and the architectural liaison officer.

### Fully Rebated Door Hinges

Fully rebated and with adjustments in three dimensions, our hinges combine traditional aesthetics with modern technology.

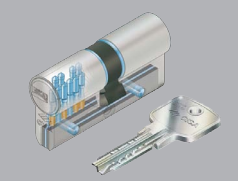

Available in both annodised silver and polished gold as shown to the right.

### Door Locking Mechanism

Utilising a three point dead-bolt lock complete with an anti-bump, anti-drill and anti-snap cylinder, our locking system is proven to resist the three main attack methods; bumping, drilling and snapping.

Available in both annodised silver and gold.

### Suited Accessories

A variety of suited accessories are available on our residential and french door products.

Items such as; letterboxes, door knockers and numerals are all available in a variety of colours to compliment your choice of handle colour.

### Door Handles

Tested to over 200,000 cycles and salt spray tested to 480 hours, our door handles (as shown above) meet all your requirements.

For full details of our 1. "range of ironmongery options", 2 "timber species mouldings and finishing options", please request a copy of our dedicated "ironmongery" and "timber species, mouldings & finishing" packs.
