DOORCO

DOORCO®

The UK's leading innovator of composite doors. Launched in April 2025, DoorCo's comprehensive range of 30-minute Fire Door slabs has been approved for the Winkhaus UK FireFrame Doorset Scheme.

Largest range of composite fire doors on the market

UKCA Approved

Security PAS24: 2022 and Secured by Design

Smoke Resistance BS EN 1634-3

Fire Resistance BS EN 1634-1

ISO: 9001
ISO: 14001

37 - 48kg

10 Year Warranty

Door furniture for illustrative purposes only. Please see page 22.

The low-maintenance Winkhaus FireFrame® system is manufactured from a specially developed GRP (glass-reinforced polymer) with fire-resistant additives. Fire tested from inside and outside of the door, Winkhaus Fire, Smoke and Security Doorset Solutions are:

Fully compliant with MHCLG Government guidelines

Tested and compliant with third party certification Q-Mark schemes for Fire, Smoke and Security

Fire tested to BS EN 1634-1:2014 and A1:2018

Smoke control resistance tested to BS EN 1634-3:2004

Tested to full PAS24 Enhanced Security Standard

Winkhaus AV2 & AV2-E Locking Systems

Our Fire Doorsets are tested and certified in the latched not locked position, without the deadlock engaged to simulate how doors are commonly closed. Doorsets tested in this manner may have difficulties in achieving a satisfactory fire test result as the heat can cause the door leaf to bow and twist. The autoLock AV2 engages automatically in three positions which helps hold the door leaf against the intumescent seals and thereby achieving a 30-minute fire and smoke performance rating.

Solid Anti-Push Back Hooks

The effective automatic multi-point locking system has two solid hooks, which throw automatically when the door is closed, ensuring complete claw engagement and security against the lock being pushed back. This means the door is securely locked when pushed closed, rendering break-in difficult.

Heavy Duty Steel Keeps

Heavy duty keeps manufactured using high grade steel, plated to comply with Grade 5 corrosion resistance BS EN1670.

Latch and Deadbolt

Precision engineered alloy sprung latch and nickel plated steel deadbolt provides the autoLock AV2 with maximum strength in the centre of the door. With an added option of an independent central deadbolt with key or thumbturn activation available to suit residential or communal entrance doors.

High Performance Gearbox

Tested to 100,000 cycles the sprung gearbox offers the lowest possible operating forces and helps prevent handle 'droop'.

Independently tested by Warrington Fire as part of BM Trada 170 certification, The Emplas 30-minute fire doorset achieved up to 58 minutes fire integrity with no failings recorded (test was terminated at 58 minutes).

The Internal Core of the Fire Stop Door

- 1 Engineered Hardwood Subframe**
Provides stability and rigidity to the door, as well as creating space for trimming down to required sizes without removing foam.
- 2 LVL (Laminated Veneered Lumber)**
Additional stability for larger sized doors.
- 3 Fire Resistant Phenolic Foam**
Fire-retardant, insulating foam which provides both fire protection and general insulation to the property.
- 4 GRP Skins**
An aesthetic choice for the external finish of our fire doors to provide them with the same woodgrain finish as our other ranges.

The Golden Thread

DoorCo Korea Q-Mark 047 Door Blank Scheme.

Door Blanks are manufactured and supplied by DoorCo as part of the BM Trada 047 Door Blank Q-Mark Scheme and are subject to annual factory process control auditing to maintain continuous certification.

Winkhaus UK Q-Mark 171 System Supplier Scheme

Doorset supplied using the Winkhaus FireFrame® incorporating the DoorCo door blank are tested and approved for resistance to fire, ambient smoke control and PAS24 security as part of the BM Trada 171 Composite System Supplier scheme, which is subject to annual process control auditing to maintain continuous certification.

Fire Stop Doors in FireFrame® shows great consistency as a fire doorset combination having passed more than 50 tests when tested to BS EN 1634-1

DoorCo System Supplier Certification Q-Mark Certification

DoorCo UK are approved under the Winkhaus System Supplier Scheme for the machining of door blank and are subject to annual audit for continuous certification.

Emplas has achieved Q-Mark Composite Fire Door Manufacture and Q-Mark Enhanced Security Doors certification in line with BM Trada requirements.

Scope of certification:
Winkhaus 30 Minute Fire/Security/Smoke Control Doorset Range – Winkhaus FireFrame® with DoorCo Solid and Glazed Door Leaf Inward & Outward Opening Composite Doorset (Glazed or unglazed).

Door furniture for illustrative purposes only. Please see page 22.

Largest Range of Composite Fire Doors on the Market.
