VICTORIAN

The Victorian is the most popular style of conservatory, with a versatility that makes it suitable for many house styles. Its distinguishing architectural feature is a bay front, giving a curved shape. A steeply pitched roof and ornate ridge details can give this style of conservatory a more classical appearance.

The Victorian style is available in:

- three facet – a bay front that has three main windows which give a curved appearance, widely angled for maximum space.
- five facet – a bay front with five main windows creating a more rounded appearance.

The Ultraframe Victorian style is available in a choice of two systems:

Classic and **Uzone**

GEORGIAN

The Georgian is a flat-fronted style that offers excellent use of floor space due to the square or rectangular internal shape.

Each side of the roof slopes back to the centre and the resulting contemporary style is suited to the majority of properties.

The Ultraframe Georgian style is available in the **Classic** system, for a more traditional look, or the **Uzone** system for a property requiring a more contemporary style.

GABLE

A gable-fronted style of conservatory adds a sense of grandeur to any home.

With the same angular floor space as a Georgian, a gable offers excellent use of internal space. The front panel of the roof remains upright rather than sloping back to the centre as on a Georgian, creating a feeling of great height within the conservatory.

The Ultraframe gable-fronted style of conservatory is available in the **Classic** system

LEAN-TO

The lean-to style is for those who prefer the clean understated lines of a Mediterranean sunroom.

Traditional or contemporary, this style is ideal for properties with limited space under the eaves or an awkward area in which to fit a conservatory. However, the pitch of the roof is variable, so that a shallow pitch could fit under a low bungalow eaves, whilst a steeper pitch would match the roof of a terraced or detached house.

The Ultraframe lean-to style is available in the **Classic**, **Uzone Elevation** and **Uzone Elevation Plus** systems from Ultraframe.

SOMETHING DIFFERENT

For homes that require a larger conservatory a P-shape, T-shape, Lantern style or Orangery are an impressive addition. The P-shape and T-shape conservatories offer a large and versatile floor space. The Lantern style is distinguished by the two tiered feature roof and is a popular choice for swimming pool enclosures.

For those wanting a modern take on an atrium roof, the Ultraframe Orangery is the perfect option to bring light and an immense feeling of space into an adjacent room. In fact, with an Orangery, you are blurring the margins between a conservatory and a glazed extension.

PERSONALISE YOUR CONSERVATORY

There are a variety of options to customise the exterior and interior of your conservatory. Here we explore the ways you can add your own finishing touches.

Cresting & Finials

Crestings and finials are the decorative fittings that run along the top of your conservatory roof. A choice of crestings and finials are available with Ultraframe conservatory roofs, dependent on which system you choose. Ranging from the ultra-modern finial and cresting to the more traditional combination, there are options to suit all tastes.

Chambered Top Cappings

The bars that run between the panels in the roof of your conservatory are covered with protective top cappings, which aid the thermal efficiency of the roof. Ultraframe can offer a choice of designs for these top cappings to give either a streamlined contemporary appearance or a more rounded traditional look.

Ultraselect

Ultraselect is a range of decorative strips to add style to the inside of your conservatory. A wide variety of designs are available and the strips simply clip into place, enabling you to change the design as you wish.

Cornice

Cornice adds a further degree of elegance to the Classic roof. Cornice shrouds the existing Classic gutter, in effect hiding the ends of the glazing bars to provide smooth clean lines at the eaves interface.

Glazing Options

If you're specifically wanting to bring a lot more light into your home, then a glass roof is the right choice for you. Ultraframe exclusively supply Conservaglass which is specially engineered for the needs of a conservatory roof.

Conservaglass works by deflecting heat from the sun in Summer to keep the inside of the conservatory cool and by retaining the warmth from heating appliances in the Winter. It also features a true self-cleaning coating that uses the power of the sun to break down organic deposits and then uses rain water to wash it clean away. A conservatory featuring Conservaglass either in Subtle Blue or Neutral Clear is the optimum glazing for your conservatory.

Polycarbonate is a lower cost alternative to glass but still provides excellent thermal properties and aesthetics. Polycarbonate is available in a range of colours, thicknesses and specifications:

- Clear
- Opal
- Bronze
- Bronze/Opal
- Solar Control

Tie Bars

A tie bar is sometimes specified to help support the weight of a large roof or one that is fitted with glass. The position of the tie bar is dictated by engineering principles and must be fitted when specified.

Ceiling Fans

Decorative ceiling fans are available in a variety of designs, with or without light fittings and the choice of an optional remote control.

Ultraframe - leading the conservatory industry through innovation and expertise

Here at Ultraframe, we've been designing and manufacturing conservatory roofing systems for 25 years and are acknowledged as industry leaders

The best products

Ultraframe have a roofing system solution to suit every home and every budget, with a choice of traditional or contemporary looks

The Ultraframe roof is the most configurable on the market ensuring a conservatory can fit every home

Ultraframe supply the widest range of conservatory styles available and offer options for personalisation to ensure your conservatory will be as individual as you are

Our products are the most thermally efficient on the market so you'll be comfortable in your conservatory all year round

Ultraframe is the only company that supplies ventilation in every roof as standard. Our patented ventilation systems are second to none, minimising condensation and ensuring that you can enjoy your conservatory whatever the weather

Choose high performance Conservaglass to help you keep cool in Summer and warm in Winter.

The reassurance of a quality brand

All Ultraframe roofs are engineered for the extremes of the UK climate and are approved by the British Board of Agrément (BBA) to last at least 25 years. They were the first systems to have passed the USA's BOCA system, the toughest testing regime in the world

Our extensive research and development team continues to innovate and extend the boundaries of design, so when you choose an Ultraframe roof, you can be certain that you're getting the best

Ultraframe Certificate of Authenticity

Of course with a reputation such as Ultraframe's, imitation is inevitable, and some disreputable companies have been known to promise to fit an Ultraframe roof, only to fit an inferior system. To help put an end to this serious problem we've introduced the Ultraframe Certificate of Authenticity – your guarantee that you have a top quality Ultraframe roof. The Certificate is a legal document that you can use to reassure future buyers of your home that your conservatory really does feature an Ultraframe roof.
