

durability by design

dempsey II Bi-Folding doors

progressive & distinctive

our “dempsey II bi-folding”  
timber doors are designed  
with durability in mind.

**Proven Solution**

Designed and manufactured “in house” by our  
dedicated team, our Dempsey II bi-folding doors offer  
a rare opportunity to combine your house and garden.

Dry gasket glazed with a sloped or concealed  
drainage system which helps to eliminate the possibility  
of moisture becoming trapped by providing ventilation  
to the rebate and an escape route.

**Superb Design**

Our door sashes are 58mm thick as opposed to the  
standard 44mm.

This additional thickness allows for improved  
locking systems with engineered laminated door stiles  
for stability.

Our Bi-Fold Door system benefits from flush fitting  
sashes giving clean lines when open or closed.

heritage range

dempsey II bi-folding doors

a way forward for **distinction**

modern security, traditional aesthetics

ironmongery options

designed with a selection of sustainably sourced timbers, our dempsey II bi-folding doors can be manufactured with a minimal environmental impact

Part of our Heritage range, the unique Dempsey II bi-folding door has been developed as a truly versatile solution that can be easily adapted to many differing situations.

Timber Species available include Sapele, Oak and Accoya. Other species are available on request. Please see our timber species brochure for further information.

The majority of our timbers are sourced with one of 'Verified Prograss', 'FSC' or 'PEFC' certification marks. These marks are designed to audit the logging industry ensuring environmental impacts are minimised.

As we have complete control of the design and manufacturing process, we can truly tailor your Dempsey II doorset to suit your requirements.

Do you aspire for unique details creating individuality?

With over 30 years experience in the design and innovation of timber products - ask for the Dempsey Bi-Fold doorset in your home.

Security

We are committed to ensuring our products stay at the forefront of innovation and design through our partnership with BSI Product Services.

Keyed or Non Keyed “Drop Bolts” are fitted to the internal face and our Residential Door “Secured by Design” deadbolt locking system and Security cylinder is fitted to the closing door.

Door Locking Mechanism

Utilising a three point dead-bolt lock complete with an anti-bump, anti-drill and anti-snap cylinder, our locking system is proven to resist the three main attack methods; bumping, drilling and snapping.

Available in both annodised silver and gold.

Tracking System

Our Bi Folding Door Pivots and Carriers are manufactured using stainless steel and engineering grade plastics.

Available in brushed stainless steel, a brass finish over the stainless steel finish, or powder coated to the required colour, we are able to tailor our products to suit your specification.

Door Handles

Tested to over 200,000 cycles and salt spray tested to 480 hours, our door handles (as shown above) meet all your requirements.

For full details of our 1. “range of ironmongery options” , 2 “timber species mouldings and finishing options”, please request a copy of our dedicated “ironmongery” and “timber species , mouldings & finishing” packs.
